

For Retailers

Vision AI for Retail

First industry scalable AI solution for shelf planning and in-store execution

Vision AI uses computer vision and advanced artificial intelligence to digitize all aspects of physical inventory, location, and availability. Repetitive and tedious tasks are automated to let you take the most efficient, next best actions at each point of time, providing enhanced visibility of in-store realities and compliance.

Who is Pensa Systems?

Leading innovator in AI Transformation at Retail

- Industry's first scalable solution for computer vision and AI at retail
- Global, blue-chip customers and major partners
- Broad product portfolio for HQ planning & in-store execution
- Proven business cases and case studies
- Future-proof system to adapt with evolving business needs
